Neomounts®

We are committed to making product choices that are sustainable and rely on the recyclability of our products. Investing in a circular economy where sustainability is at the heart of everything we do. A sustainable approach is essential in addressing global climate change.

Environmental footprint

Greenhouse gasses emitted into the environment during production of a product contribute directly to our planet's global warming.

Using LCA software¹ we are able to calculate² the (potential) environmental footprint, measured in kilograms CO₂-equivalent. This enables us to evaluate a product's footprint and support the design of sustainable products.

By recycling our products the impact on the environment can be reduced as the recycled material replace the need to produce virgin materials.

Steel	99,3%
ABS	0,4%
PA	0,2%
Rubber	0,1%
POM	0,01%

Emitted carbon dioxide

To illustrate the effect of a kilogram carbon dioxide, we converted it to kilometres driven by a car.

Without recycling

140,52 kg CO₂ 426 km*

With recycling

86,3 kg CO₂ 262 km*

PLASMA-M1950E									
	Steel	ABS	PA	Rubber	РОМ		Total		
Material weight (g)	37169,7	162,9	63,1	44,9	2,8		37443,4		
Kilograms CO ₂ -equivalent									
Without recycling	138,82	1,01	0,59	0,08	0,01		140,51		
Recycling reduction %							39%		
With recycling	84,71	0,95	0,57	0,07	0,01		86,30
